Look east and feast your eyes on the stunning views of one of the world's largest freshwater lakes, Lake Michigan. The land along this truly Great Lake is home to beautiful parks and cultural attractions including Millennium and Grant Parks, the Shedd Aquarium and the Adler Planetarium. Due east, across the water you just might see the shore of Michigan.

To the north you'll see many of the other notable skyscrapers that help make up Chicago's iconic skyline. You'll also see the Chicago River, Lincoln Park Zoo and world-famous Wrigley Field. Look to the horizon and you'll start to see how the city's growth has bridged the border to blend with the cities of southern Wisconsin.

Looking west, you'll see the constant air traffic of O'Hare and Midway Airports. The west side of the city is also home to renowned University of Illinois' Chicago campus, the United Center, Oprah's Harpo Studios and historic Little Italy and Greektown. But the true highlights of the western view are the spectacular sunsets and The Ledge with its unbelievable views straight down, 1,353 feet.
